

CAMCODE[®]

Warehouse Labels and Signs

Camcode has warehouse label solutions for every application in your warehouse. Choose from our indestructible floor label systems, rack labels, long-range retro-reflective labels, hanging signs, and more.

Bulk Storage Location Marking

Our Warehouse Floor Labels are durable enough to survive abuse from pallets and vehicular traffic on the warehouse floor, while our Retro-Reflective Signs are designed to reach scanning distances of up to 50 feet with long-range scanners.

Warehouse Floor Bar Code Labels

Our Warehouse Floor Labels are ideal marking solutions for bulk and staging locations. Choose from Adhesive or Screw-Down Floor Label kits. Each easily installs in less than 5 minutes per label.

Hanging Retro-Reflective

Our most popular and cost effective hanging sign features a universal bracket, which guarantees proper scanning angles when hung from conduit, suspended wire or pipe.

Bent PVC Retro-Reflective

Featuring a bent PVC backer, this sign is an alternative to our Hanging Retro-Reflective Sign. Mount it directly to bar joists or existing fixtures with foam tape.

Two Sided Retro-Reflective

Our Two-Sided Retro-Reflective Labels have slanted sides to provide the proper scanning angle from either location.

Custom Signs

Hanging

These lightweight, yet tough Hanging Signs feature a white plastic backer for high visibility.

Aisle

Our durable Aisle Signs are ideal for identifying rack and shelf ends of warehouses.

Door and Dock Signs

These signs are easily readable and durable to withstand indoor and outdoor warehouse environments.

Warehouse Rack Bar Code Labels

Whether you have Selective, Drive In, Push Back, Gravity Flow or any other type of racking system, we work with you to create customized Warehouse Rack Labels for your needs.

Polyester

Our popular Polyester Rack Labels are more durable and longer lasting than typical paper labels.

Rack Mount Retro-Reflective

These labels can be applied to the front of racks or wraparound to scan upper levels while on the floor.

Magnetic

These Magnetic Rack Labels are perfect if you require the ability to relocate labels.

Cold Storage

These Cold Storage Labels are designed for installation in environments as low as -20°F.

Multi-Level System

Our Multi-Level Rack Labels can eliminate the need for long-range scanning.

Other Warehouse Options

Pallet Bar Code Labels

Durable Metalphoto® anodized aluminum bar code labels resist scuffing and abrasion, as well as inclement conditions both inside and outside the warehouse.

Returnable Container, Tote and Tray Bar Code Labels

Ideal for tracking your totes, trays, containers and other returnables, these labels resist cleaning processes, abrasion, chemicals, and outdoor exposure.
